PRICE LIST

of Evergreen Vines and Ground-Cover

Some of the principal uses of ground-cover are as follows: In rockeries, bordering walks and drives, bordering shrubs and flower-beds, under Evergreen and shrub plantings, in semi-shade or dense shade, or steep terraces, in cemetery plots, for winter window-boxes, among stepping-stones, and many others. We offer only hardy tested sorts listed below.

JAPANESE SPURGE (*Pachysandra terminalis*)

A splendid Evergreen ground-cover with thick, glossy, green foliage, forming a dense mat, making low-growing cover plant. Excellent for edging, underplanting, etc. Does well in dense shade where grass will not grow. Keeps its leaves all winter and is very hardy. Grows 6 to 9 inches tall and spreads along the ground. It grows in a clump and stools out. To form a heavy mat in a few seasons, it should be planted fairly close—12x12 inches is about the right distance. The more dense the shade the darker green the foliage becomes.

Strong plants

6 to 8 inches (transplanted), Each 30c; 10 for \$2.50;
25 for \$5.25; 50 for \$9.50; 100 for \$18.00.

EVONYMUS RADICANS VEGETA

This is an Evergreen vine that has no rival among all vines, either Evergreen or Deciduous. In late fall and winter it produces an abundance of showy red fruit and yellow pods. By means of aerial rootlets it clings closely to brick or stone walls; soon makes a good covering. The growth is rapid.

Strong plants

6 to 8 inches (transplanted) Each 45c; 10 for \$4.00;
25 for \$8.25; 50 for \$15.50; 100 for \$30.00.
